

Service

**You provide us with your clone
– we'll supply you with the antibodies**

- From mg to kg
- Cell culture supernatant with extremely high mAb concentration
- Purified mAb
- Labelled mAb
- Mab for further manufacturing use (FFMU)

Your advantages

- Long term experience in professional contract manufacturing
- Broad and innovative fermentation technology fits multiple cell types
- Robust and effective purification processes
- Effective labelling processes
- Deadlines are always met
- Good value contract manufacturing

You can profit from our experience of more than 20 years in

- Hybridoma technology,
- manufacturing and
- production.

Certified quality management system for design, manufacture and final control

- ISO 9001
- ISO 13485
- Manufacturer of list A mAb acc. to IVD directive 98/79/EC
- FDA registered manufacturing facility No. 9085844

SIFIN-6-Week-Special

Unbelievable, but true!
We offer a SIFIN-6-Week-Special manufacturing process for mAb, up to 5 g purified monoclonal IgG **within 6 weeks!**

Our assumptions for SIFIN-6WS

- cell line without infection
- doubling time <24 hours
- specific cell line productivity $\geq 5 \mu\text{g} / 10^6 \text{ cells} / 24 \text{ hours}$
- cell line is adapted to SIFIN inhouse media for production
- human or mouse IgG

We are interested in the following service package – please contact us

mAb contract manufacturing

- Cell culture supernatant
- Purified mAb
- Labelled mAb
